

Can you solve the periodic table
cipher and name the element that
is being described?

aluminium 13 Al 26.982	hydrogen 1 H 1.0079	argon 18 Ar 39.948	fluorine 9 F 18.998	boron 5 B 10.811
--	-------------------------------------	------------------------------------	-------------------------------------	----------------------------------

lithium 3 Li 6.941	scandium 21 Sc 44.956	argon 18 Ar 39.948	fluorine 9 F 18.998	boron 5 B 10.811	potassium 19 K 39.098
------------------------------------	---------------------------------------	------------------------------------	-------------------------------------	----------------------------------	---------------------------------------

beryllium 4 Be 9.0122	phosphorus 15 P 30.974	vanadium 23 V 50.942	silicon 14 Si 28.086	carbon 6 C 12.011	hydrogen 1 H 1.0079	magnesium 12 Mg 24.305	magnesium 12 Mg 24.305
---------------------------------------	--	--------------------------------------	--------------------------------------	-----------------------------------	-------------------------------------	--	--
